San Juan, Puerto Rico

day trader & hedgefund manager assistant

Agust 2020 - Octubre 2021

- Develop trading plans with the team to target daily goals
- Analysis of Data for different markets technology indexes, commodities, and cryptos currencies
- develop and track Risk management strategies

PROJECTS

Airbnb Clone

A replica of AirBnB built with Python and MySQL on a Nginx server

May 2021

- Built a command interpreter to manipulate data without a visual interface, like in a Shell, which helps for development and debugging
- Implemented two options for back-end storage engines: ORM with SQL and File System with JSON
- Completed a website for the front end, which shows both static and dynamic content
- Integrated an API that provides a communication interface between the front end and the data from the back-end

Not So Simple Shell

A replica of Shell built-in C

December 2020

- Developed a command interpreter that works like Shell, with the use of system calls and zero memory leaks
- Implemented signal handling and two modes of usage: interactive and non-interactive

SKILLS & INTERESTS

- **Languages:** Spanish and English
- **Programming Languages:** C, Python, Bash, MySQL, JavaScript
- **Tools:** Git, Vim, Shell, Vagrant, VirtualBox, Linux, Nginx
- **Skills:** autodidactic, public speaking, mathematical aptitude, problem-solving, interpersonal communication, teaching
